| These units were written to build upon concepts from prior units, so later units contain tasks that depend upon the concepts addressed in earlier units. All units will include the Mathematical Practices and indicate skills to maintain. However, the progression of the units is at the discretion of districts. |  |  |  |  |  |  |

| Counting With Friends | Comparing Numbers | Sophisticated Shapes | Measuring and Analyzing Data |
| Know number names and the count sequence <br> MGSEK.CC. 1 Count to 100 by ones and by tens. <br> MGSEK.CC. 2 Count forward beginning from a given number within the known sequence (instead of having to begin at 1 ). MGSEK.CC. 3 Write numbers from 0 to 20. Represent a number of objects with a written numeral 0-20 (with 0 representing a count of no objects). <br> Count to tell the number of objects. <br> MGSEK.CC. 4 Understand the relationship between numbers and quantities; connect counting to cardinality. <br> a. When counting objects, say the number names in the standard order, pairing each object with one and only one number name and each number name with one and only one object. (one-to-one correspondence) <br> b. Understand that the last number name said tells the number of objects counted (cardinality). The number of objects is the same regardless of their arrangement or the order in which they were counted. <br> c. Understand that each successive | Work with numbers 11-19 to gain foundations for place value. <br> MGSEK.NBT. 1 Compose and decompose numbers from 11 to 19 into ten ones and some further ones to understand that these numbers are composed of ten ones and one, two, three, four, five, six , seven, eight, or nine ones, e.g., by using objects or drawings, and record each composition or decomposition by a drawing or equation (e.g., $18=10+8$ ) <br> Know number names and the count sequence. <br> MGSEK.CC. 3 Write numbers from 0 to 20. Represent a number of objects with a written numeral 0-20 (with 0 representing a count of no objects). <br> Count to tell the number of objects. <br> MGSEK.CC. 4 Understand the relationship between numbers and quantities; connect counting to cardinality. <br> a. When counting objects, say the number names in the standard order, pairing each object with one and only one number name and each number name with one and only one object. (one-to-one correspondence) <br> MGSEK.CC. 5 Count to answer 'how many?" questions. <br> a. Count to answer "how many?" | Identify and describe shapes (squares, circles, triangles, rectangles, hexagons, cubes, cones, cylinders, and spheres). MGSEK.G. 1 Describe objects in the environment using names of shapes, and describe the relative positions of these objects using terms such as above, below, beside, in front of, behind, and next to. <br> MGSEK.G. 2 Correctly name shapes regardless of their orientations or overall size. MGSEK.G. 3 Identify shapes as twodimensional (lying in a plane, "flat") or threedimensional ("solid"). <br> Analyze, compare, create, and compose shapes. <br> MGSEK.G. 4 Analyze and compare two- and three-dimensional shapes, in different sizes and orientations, using informal language to describe their similarities, differences, parts (e.g., number of sides and vertices/"corners") and other attributes (e.g., having sides of equal length). <br> MGSEK.G. 5 Model shapes in the world by building shapes from components (e.g., sticks and clay balls) and drawing shapes. <br> MGSEK.G. 6 Compose simple shapes to form larger shapes. For example, "Can you join these two triangles with full sides touching to make a rectangle?" | Describe and compare measurable attributes. <br> MGSEK.MD. 1 Describe several measurable attributes of an object, such as length or weight. For example, a student may describe a shoe as, "This shoe is heavy! It is also really long!" <br> MGSEK.MD. 2 Directly compare two objects with a measurable attribute in common, to see which object has "more of"'"less of" the attribute, and describe the difference. For example, directly compare the heights of two children and describe one child as taller/shorter. <br> Classify objects and count the number of objects in each category. <br> MGSEK.MD. 3 Classify objects into given categories; count the numbers of objects in each category and sort the categories by count. ${ }^{5}$ |
