PROGRAM CONCENTRATION: Architecture, Construction, Communications & Transportation
CAREER PATHWAY: METALS TECHNOLOGY
COURSE TITLE: Sheet Metal I
PREREQUISITE: Introduction to Metals

COURSE DESCRIPTION: This course is designed to allow students to master basic sheet metal techniques. This course includes the development of skills in basic trade math. Students will identify, rate, select, and use steel and other metals to develop and fabricate basic sheet metal projects. The course includes basic parallel line development and skills using fasteners, hangers, and other support systems. Minimum performance requirements for this course are based on successful student completion according to the National Center for Construction Education and Research Center (NCCER) Occupation Standards. Students who successfully complete the course in accordance with NCCER standards are eligible for registration with the NCCER Craft Worker Registry.

INTRO TO PARALLEL LINE DEVELOPMENT

ACCT-SMI-1 Students will demonstrate proficiency in parallel line development.

a. Demonstrate an understanding of parallel line development as one of the three development methods for laying out sheet metal patterns.
b. Demonstrate competency in parallel line development layout procedures.
c. Demonstrate how to lay out patterns utilizing basic parallel line development.

Academic Standards:

MM1G1. Students will investigate properties of geometric figures in the coordinate plane.

a. Determine the distance between two points.
b. Determine the distance between a point and a line.
c. Determine the midpoint of a segment.
d. Understand the distance formula as an application of the Pythagorean theorem.
e. Use the coordinate plane to investigate properties of and verify conjecture related to triangles and quadrilaterals.

MM1G3. Students will discover, prove, and apply properties of triangles, quadrilaterals, and other polygons.

a. Determine the sum of interior and exterior angles in a polygon.
b. Understand and use the triangle inequality, the side-angle inequality, and the exterior-angle inequality.
c. Understand and use congruence postulates and theorems for triangles (SSS, SAS, ASA, AAS, HL).
Implementation date
Fall 2010

d. Understand, use, and prove properties of and relationships among special quadrilaterals: parallelogram, rectangle, rhombus, square, trapezoid, and kite.
e. Find and use points of concurrency in triangles: incenter, orthocenter, circumcenter, and centroid.

MM2G1. Students will identify and use special right triangles.
   a. Determine the lengths of sides of 30°-60°-90° triangles.
   b. Determine the lengths of sides of 45°-45°-90° triangles.

MM2G3. Students will understand the properties of circles.
   a. Understand and use properties of chords, tangents, and secants as an application of triangle similarity.
   b. Understand and use properties of central, inscribed, and related angles.
   c. Use the properties of circles to solve problems involving the length of an arc and the area of a sector.
   d. Justify measurements and relationships in circles using geometric and algebraic properties.

MM2G4. Students will find and compare the measures of spheres.
   a. Use and apply surface area and volume of a sphere.
   b. Determine the effect on surface area and volume of changing the radius or diameter of a sphere.

MATH APPLICATIONS I
ACCT-SMI-2 Students will compute and solve mathematically, problems in sheet metal.

   a. Convert denominate numbers and multiply and divide them.
   b. Calculate successfully using various rule measurements.
   c. Calculate successfully using appropriate linear, square, weight, and volume measurements.
   d. Construct simple geometric figures and solve basic geometry problems that relate to the sheet metal trade.

Academic Standards:

MM1G1. Students will investigate properties of geometric figures in the coordinate plane.
   f. Determine the distance between two points.
   g. Determine the distance between a point and a line.
   h. Determine the midpoint of a segment.
   i. Understand the distance formula as an application of the Pythagorean theorem.
   j. Use the coordinate plane to investigate properties of and verify conjecture
related to triangles and quadrilaterals.

**MM1G3. Students will discover, prove, and apply properties of triangles, quadrilaterals, and other polygons.**

f. Determine the sum of interior and exterior angles in a polygon.
g. Understand and use the triangle inequality, the side-angle inequality, and the exterior-angle inequality.
h. Understand and use congruence postulates and theorems for triangles (SSS, SAS, ASA, AAS, HL).
i. Understand, use, and prove properties of and relationships among special quadrilaterals: parallelogram, rectangle, rhombus, square, trapezoid, and kite.
j. Find and use points of concurrency in triangles: incenter, orthocenter, circumcenter, and centroid.

**MM2G1. Students will identify and use special right triangles.**

c. Determine the lengths of sides of 30°-60°-90° triangles.
d. Determine the lengths of sides of 45°-45°-90° triangles.

**MM2G3. Students will understand the properties of circles.**

e. Understand and use properties of chords, tangents, and secants as an application of triangle similarity.
f. Understand and use properties of central, inscribed, and related angles.
g. Use the properties of circles to solve problems involving the length of an arc and the area of a sector.
h. Justify measurements and relationships in circles using geometric and algebraic properties.

**MM2G4. Students will find and compare the measures of spheres.**

c. Use and apply surface area and volume of a sphere.
d. Determine the effect on surface area and volume of changing the radius or diameter of a sphere.

**FASTENERS, HANGERS, AND SUPPORTS**

ACCT-SMI-3 Students will demonstrate the ability to use and identify fasteners, hangers, and supports.

a. Identify the various kinds of fasteners used in sheet metal work.
b. Use the right fasteners for the right job.
c. Identify the various aspects of screw and bolt configurations.
d. Describe some of the more common methods of supporting ducts.
e. Identify the materials used for hanging and supporting ducts.
f. Identify the factors that pertain to the selection and use of hangers and supports.
g. Demonstrate skill in the installation of duct fasteners, hangers, and supports.

STEEL AND OTHER METALS
ACCT-SMI-4 Students will demonstrate the ability to identify and measure different types of metals used in sheet metal.

a. State the difference between a pure metal and an alloy.
b. List the eleven common properties of metals.
c. State the chief types of metals.
d. Measure the gage of sheet metal.

Academic Standards:
SPS4. Students will investigate the arrangement of the Periodic Table.

a. Determine the trends of the following:

- Location of metals, nonmetals, and metalloids

b. Use the Periodic Table to predict the above properties for representative elements.

Reading Across the Curriculum

Reading Standard Comment
After the elementary years, students engage in reading for learning. This process sweeps across all disciplinary domains, extending even to the area of personal they experience text in all genres and modes of discourse. In the study of various disciplines of learning (language arts, mathematics, science, social studies), students must learn through reading the communities of discourse of each of those disciplines. Each subject has its own specific vocabulary, and for students to excel in all subjects, they must learn the specific vocabulary of those subject areas in context.

Beginning with the middle grades years, students begin to self-select reading materials based on personal interests established through classroom learning. Students become curious about science, mathematics, history, and literature as they form contexts for those subjects related to their personal and classroom experiences. As students explore academic areas through reading, they develop favorite subjects and become confident in their verbal discourse about those subjects.

Reading across curriculum content develops both academic and personal interests in students. As students read, they develop both content and contextual vocabulary. They also build good habits
for reading, researching, and learning. The Reading Across the Curriculum standard focuses on the academic and personal skills students acquire as they read in all areas of learning.

CTAE-RC-1 Students will enhance reading in all curriculum areas by:

a. Reading in all curriculum areas
   - Read a minimum of 25 grade-level appropriate books per year from a variety of subject disciplines and participate in discussions related to curricular learning in all areas.
   - Read both informational and fictional texts in a variety of genres and modes of discourse.
   - Read technical texts related to various subject areas.

b. Discussing books
   - Discuss messages and themes from books in all subject areas.
   - Respond to a variety of texts in multiple modes of discourse.
   - Relate messages and themes from one subject area to messages and themes in another area.
   - Evaluate the merit of texts in every subject discipline.
   - Examine author’s purpose in writing.
   - Recognize the features of disciplinary texts.

c. Building vocabulary knowledge
   - Demonstrate an understanding of contextual vocabulary in various subjects.
   - Use content vocabulary in writing and speaking.
   - Explore understanding of new words found in subject area texts.

d. Establishing context
   - Explore life experiences related to subject area content.
   - Discuss in both writing and speaking how certain words are subject area related.
   - Determine strategies for finding content and contextual meaning for unknown words.

CTAE Foundation Skills

The Foundation Skills for Career, Technical and Agricultural Education (CTAE) are critical competencies that students pursuing any career pathway should exhibit to be successful. As core standards for all career pathways in all program concentrations, these skills link career, technical and agricultural education to the state’s academic performance standards.

The CTAE Foundation Skills are aligned to the foundation of the U. S. Department of Education’s 16 Career Clusters. Endorsed by the National Career Technical Education Foundation (NCTEF) and the National Association of State Directors of Career Technical Education Consortium (NASDCTEc), the foundation skills were developed from an analysis of all pathways in the sixteen occupational areas. These standards were identified and validated by a national advisory group of employers, secondary and postsecondary educators, labor associations, and other stakeholders. The Knowledge and Skills provide learners a broad foundation for managing lifelong learning and career transitions in a rapidly changing economy.
Implementation date
Fall 2010

**CTAE-FS-1 Technical Skills:** Learners achieve technical content skills necessary to pursue the full range of careers for all pathways in the program concentration.

**CTAE-FS-2 Academic Foundations:** Learners achieve state academic standards at or above grade level.

**CTAE-FS-3 Communications:** Learners use various communication skills in expressing and interpreting information.

**CTAE-FS-4 Problem Solving and Critical Thinking:** Learners define and solve problems, and use problem-solving and improvement methods and tools.

**CTAE-FS-5 Information Technology Applications:** Learners use multiple information technology devices to access, organize, process, transmit, and communicate information.

**CTAE-FS-6 Systems:** Learners understand a variety of organizational structures and functions.

**CTAE-FS-7 Safety, Health and Environment:** Learners employ safety, health and environmental management systems in corporations and comprehend their importance to organizational performance and regulatory compliance.

**CTAE-FS-8 Leadership and Teamwork:** Learners apply leadership and teamwork skills in collaborating with others to accomplish organizational goals and objectives.

**CTAE-FS-9 Ethics and Legal Responsibilities:** Learners commit to work ethics, behavior, and legal responsibilities in the workplace.

**CTAE-FS-10 Career Development:** Learners plan and manage academic-career plans and employment relations.

**CTAE-FS-11 Entrepreneurship:** Learners demonstrate understanding of concepts, processes, and behaviors associated with successful entrepreneurial performance.
