

The Grass is Always Greener

The Creekview High School Booster Club is considering replacing the grass on the football field with a new and softer type. There have been many complaints of injuries, and the principal has asked them to investigate other options. Local fans have agreed to volunteer the time and equipment to get the job done. The Booster Club is only concerned with the cost of purchasing the sod for the field. They are looking for the best buy for their money.

Use this QR code to view various types of sod. In your final proposal, you will be required to indicate which type would be best and why.

Attached are the price quotes from various local nurseries. The field dimensions are 120 yards x 160 feet.

Write a proposal to the booster club including the following....

- ❖ **Which is the best buy? Explain.**
- ❖ **How many rolls of sod will be needed?**
- ❖ **What is the total cost?**
- ❖ **Which type of sod is best for the field? Explain.**
